

OLD SHERIFF'S HOUSE FOUNDATION INCORPORATED

JANUARY 2016

2015 was another successful year for the Sheriff's House Foundation with many planned projects completed by the end of the busy year. With contributions, grants and help from volunteers, the Foundation has met several goals. 2016 promises more ongoing activities with projects continuing restoration of the Old Sheriff's House and Jail.

Included are updates of the activity of the past year:

- The Foundation reconstructed the West side stone steps to include new disabled accessibility, and railings on the Main Street entrance.
- A new water main has been put in place updating the old county infrastructure system. To insure adequate environmental conditions for the system, the contribution of a forced air furnace has been installed in the former jail basement.
- The window renovation project in the 1909 third floor Southwest section has been completed. All windows have been glazed & installed, and closure hardware systems rehabilitated. This aids the weatherproofing and insulation of this internet equipment area of the building.
- Grants from current years have enabled floor repair on the second floor of the residence. This enables these rooms to proceed toward complete restoration in preparation for use of a prospective tenant, research and archive occupancy.
- Ornamental lighting in the former residence first floor has been installed. Continued supplemental electric work throughout the building has proceeded during the year.

We invite your participation in the project's work and restoration, and renewal of membership in the Foundation in the years ahead.
